

Oil meters with LCD display and integral 4-20mA output

Honeywell Smart Energy, including the legacy Elster AMCO Water, is pleased to announce the availability of a positive displacement fuel oil meters with LCD totalizer display and integral 4-20mA output. Meters are available in sizes $\frac{1}{2}$ " , $\frac{3}{4}$ " , 1" , $1\frac{1}{2}$ " and 2" . The LCD version oil meters now provide the capability to directly display and output rate of flow signals (gph, L/h) without need of intermediate devices for converting pulse outputs. Current versions continue to be offered including direct read, reed switch pulse, and inductive pulse models.

Units of registration are field programmable among USG and Metric, meaning there is no differentiation for part numbers.
